

## MCMP Environment Standing Committee Goals for 2019

The Environment Standing Committee to the Board of Park Commissioners of Mill Creek MetroParks has adopted these goals for 2019:

1. A Waste Reduction Plan throughout the MetroParks will be explored and developed by the Committee.
2. The use of renewable energy sources and conservation of natural areas within the MetroParks will be explored.

It is the Committee's belief that these two broad, "umbrella" goals will give us many possible options which may be narrowed as we proceed.
