

Environment Minutes - April 18, 2019

I. Call to order 12:04 - all members present

II. Minutes approved - Martin and Campbell

III. Liaison report -

No changes in oil and gas wells.

Presentation to Board well-received by board and attendees. Hoping for some response from Board at May meeting.

Butlers are being installed throughout the park.

Aeration of Lilly pond is moving forward, wiring is being installed now and pond company will be ready to move in when electric is available. Electrical panel will allow possibility of adding on in the future ex. lighting or security camera.

IV. Old Business

The recent trout release in Glacier promoted discussion of fishing line recycling containers. Committee members will be watching for groups that might be interested in construction.

Noble reported no movement forward on collaboration with Horticulture as their last meeting was canceled. He will attend the next scheduled meeting.

Milliken reported that Ian Benniston of Youngstown Neighborhood Development Cooperation will be a guest at our May 16 meeting to share his experience with solar panels ...also invited Valley Energy Solar who installed the panels for YNDC

Noble reminded us that Baron has created a Google Doc that all of us can access.

V. New Business

Noble suggested that we explore meeting at other areas or plan on an evening walk in the park that we as committee members are not familiar. Decision will be made in May for committee to make plans for summer.

Discussion the issue of vegetation growing around the lakes....buffer zones may impede view of lakes... need varies from place to place. Buffer zones already exist. Perhaps address specific areas where buffer zones can be expanded ...suggestion for committee to visit/identify some potential areas as we make summer plans for meetings.

Meeting adjourned at 1:23 - Kravitz and Baron. Next meeting Noon, May 16
